

Dear Hiring Manager,

As I am eager to in the Urban Planning and Development sector, The “Assistant Consultant-Infrastructure Advisory” position at Steer India encapsulates my aspirations. For the last One and a Half years I’m using my capabilities of GIS analysis and quantitative-qualitative analysis to solve urban problems and their usability in urban planning, public utilities, and services.

I’m currently working as an Urban Planner in the Nirmal Agra Project (GoMassive Incubators Pvt. Ltd.) working with Agra Municipal Corporation and “Alliance to END Plastic waste” in the city of Taj, (Agra, India), My role is to form strategies and route plan for better plastic waste collection in the city by using qualitative and quantitative methods.

Before that, I was working as a Project Associate at the business development team of All India Institute of local self-government and communicating with different stakeholders such as Govt., Consultants and different communities in the project procurement and bidding process. I was supporting AILSG in research to produce quality technical proposals.

Under the sponsorship of Namami Gange and the National institute of urban affairs (NIUA), I have completed my thesis research on citizen engagement in river management and economy, A case study of Kanpur, India. Where I tried to find out the ways and strategies to engage citizens in sustainable ways of livelihood practices by using different types of data sets. It was widely recognized among the decision-makers and contributed to their understanding of the impact of river-related decision-making on the livelihood of the riverine community and their participation. I'm one of the three winners of the thesis competition "Reimagining Urban rivers" at the national level jointly organized by Namami Gange and (NIUA) Mohua.

To diversify my knowledge, I have also done academic projects on the topics of Projectisation of the development plan (Prayagraj), community-based ecotourism Local Area Plan (Bhopal), and sustainable transport planning (Indore) to ensure sustainable development by checking the economic feasibility of the project.

I have completed a Bachelor of Planning in the city/urban, community and Regional Planning from the School of Planning and Architecture, Bhopal. I’m confident that my knowledge and experience of research and analytic skills in urban Development, urban-related issues, and environment systems, research in policy and governance, and precise attention to detail would make me an asset in the work opportunity provided by you.

I understand that the role of the will be diverse. At the School of Planning and Architecture, Bhopal I specialized in urban Planning and working with NIUA and AILSG, I learnt deep diving into the research. I can assure you that my capabilities of soft and hard skills will help me to gather all the proficiency required for a position. The Position would be an exciting opportunity for me to bring my educational background to the table and learn more with the practitioner and researchers.

Please don’t hesitate to reach out if you have any questions about my background. I look forward to the opportunity to speak with you further; thank you for your time and consideration.

Thanks and Regards

Ujjawal Singh (+919319331483)
